Emium Lighting LLC To Provide Photometric Analysis

Work with Emium's Lighting Engineers and Photometric Analysts to design the most effective lighting layout.

Lake Zurich, IL— 07/19/2023 — Emium Lighting LLC announces that they will now offer Photometric Analysis with their in-house Photometric Analysts: enabling customers and building architects to create custom lighting designs for any layout. Emium can assist their customers visualize their next projects with 3D Architectural layouts, detailed renderings, and photometric reports.

Many of Emium's customers have already utilized the photometric analysis which has allowed them to maximize the customer's savings by calculating the minimum number of fixtures needed to reach the desired light levels while ensuring proper lighting coverage and spread.

Photometric Analysis is a new offering guided by customer feedback and Emium Lighting LLC's commitment to providing their customers with technical expertise and dedication to providing top tier LED Lighting products to customers at a fair price.
